# How much water are you using?

Designed for harsh environments. Wildeye® connects to global IoT cellular networks for maximum global coverage. There is no need for complicated radio infrastructure. Scale from one to thousands of sensors with minimal investment.

TELSTRA CAT M1 COVERAGE

Wildeye® works out of the box with plug and play connectors to connect infield sensors to the cloud and single button activation. All your data is then uploaded to the cloud for viewing on the portal or smartphone app.

WILD-M-R-NACS-TEL

Network	Telstra CatM1
Inputs	1 x 4-20Ma 1 x Counter 1 x SDI12
Power	Rechargeable Battery Solar or PSU Options
Waterproof	IP68
